POWER PRODUCTS

Power Plus LS3 Square Port Heads

Refined 280cc intake ports for throttle response and upper end power. Designed to significantly increase horsepower and torque throughout a wide power band. 70cc chambers designed for 4.000" or larger bores. Enhanced precision cast from A356 aluminum. Designed to use most LS3 style intake manifolds and components. Features include 8mm bronze manganese guides, hardened valve seats, large spring seats, and multi-angle valve job. **Assemblies** feature 2.165"/1.600" stainless valves, Howards Cams valve springs and chrome moly steel retainers.

- High flowing 280cc intake ports
- Machined with 2.165" x 1.600" valve job
- 6 bolt per cylinder capability
- Compatible with all LS3 intake manifolds & components

TIMING SETS

DOUBLE ROLLER BILLET STEEL TIMING SETS / BEL DRIVES

DOUBLE ROLLER BILLET STEEL TIMING SETS WITH IWIS SEVERE APPLICATION CHAIN

The IWIS chain, designed and widely known for its strength and durability in the most extreme conditions. This precision made special heat-treated high strength steel chain is the choice of the most serious engine builders. These sets include a CNC machined billet steel cam sprocket with lightening holes, a heat-treated crank sprocket with 9-keyways and a black oxide coating and Torrington thrust bearing.

BELT DRIVE TIMING SETS

The Ultimate Camshaft Drive for your competition engine. Manufactured from the finest materials on state of the art CNC machining centers. These belt drives will deliver reduced valve train harmonics, precise valve timing and longer valve spring life. A fully rollerized thrust housing means less friction. A full 20° of Valve Timing adjustment.

- **Designed for Reduced Valve Train Harmonics**
- **Precise Valve Timing**
- **Simple valve timing adjustments in minutes**
- **Quick and easy cam changes**

EXTREME BLACK™ SEVERE APPLICATION VALVES

Engineered for high rpm and high horsepower applications. Extreme Black™ feature a gloss black nitride and are perfect for high temperatures (they run cooler which improves valve life), nitrous, turbo and supercharger applications. For naturally aspirated motors these valves will give you a much greater cylinder flow for horsepower gains. They start as a one piece forged, high temperature, high nickel, stainless steel alloy. CNC finished to strict tolerances making these valves the choice for the most demanding race classes. The black nitride micro-hardness is higher than the stainless steel base material. No process can match it for surface hardness. Surface finish is smoother than with chromed stems, having less friction between stem and guide. The black nitride reduces power loss due to less valve-guide friction. Nitriding is not a coating, it is a process where it actually becomes part of the steel. Sold as each.

- High Nickel Stainless Alloy 1pc. Forgings
- Special Black Nitride Process (not a coating)
- Great for Naturally Aspirated Applications
- Great for Supercharged / Nitrous Applications
- Designed for High Horsepower Applications
- Runs Cooler, Improves Valve Life
- Fully CNC Machined Finished
- Surface Finish is Smoother than Chrome
- Higher Micro-Hardness than Stainless
- Undercut Stems for Increased Flow

Stainless Steel High Performance Valve Sets

We continually beat up valve manufacturers on large quantities of valves. When they compete with each other to increase their sales, we pass the savings on to you. These are the same valves that other people are selling, but up to 65% less! These valves are manufactured of high grade 21-4N stainless steel material. Quality one-piece forgings. Valve stems are hard chromed and micro polished for an exceptional finish and to reduce wear. Fully machined combustion faces. Hardened tips to resist valve stem wear.

Lash Caps

Because today's racing engines run at higher and higher rpm levels and the cam profiles are extremely harsh, the tip of the valve stem is subjected to a tremendous amount of pounding. Precision machined and ground perfectly flat to maintain accuracy of valvetrain adjustment. They fit the valve stems well and can be removed with relative ease because of a tiny hole to relieve the suction created when removing the lash cap. Sold in sets of 16.

Chev SB 8mm Lightweight Valvetrain Conversion

Designed for better valve control and increased valvetrain stability. These lightweight conversions start with valves with smaller 8mm stems. They feature inverted conical valve springs and small 1.055" diameter retainers for even more weight savings. Because of this reduction in weight, you can use less spring pressure to handle more rpm and more aggressive cam profiles. Valves and valve locks are bead lock design for better clamping force. Perfect for occasional use at the strip, but durable for the street. Great for hydraulic/mechanical flat tappet or hydraulic roller cam applications. **Note:** Conversion requires use of either 8mm valve guide liners or 8mm valve guides (listed below).

Each Complete Kit Includes:

- 16 Stainless Steel Valves with 8mm Valve Stems
One piece, Chrome Stem, Hardened Tip
- 16 Howards Cams™ Beehive Valve Springs
108 @ 1.800", 345 @ 1.225", 1.150" Coil Bind, .600" Max Lift

VALCO CINCINNATI PIONEER Automotive Industries **Gasket Remover**

The Peeler™ is amazingly effective at removing silicone gasket material. It also works well when removing paper or fiber gasket residue. It is much easier and faster than common knives or scrapers. The Peeler's unique, self-leveling conical blade does not dig or gouge into surfaces. Free rotation of the blade maintains a good, sharp cutting edge without nicks or flat spots. The Peeler can be used in any of the following motions: forward, backward, sideways, circular, and upside-down.

VALCO CINCINNATI **"Powered Peeler" Gasket Remover**

Designed for powered screw drivers and air-ratchets (max. 500 rpm). It fits 9/16" sockets. Like The Peeler™, it is amazingly effective at removing silicone gasket material. It also works well when removing paper or fiber gasket residue. It is much easier and faster than common knives or scrapers. The Peeler's unique, self-leveling conical blade does not dig or gouge into surfaces.
